Contents of Volume 15

No. 1

M. H. DE FREITAS: Editorial 1

P. B. JOHNSON: Shallow foundations on London Clay 3

M. G. ANDERSON, M. G. HUBBARD & P. E. KNEALE: The influence of shrinkage cracks on pore-water pressures within a clay embankment 9

A. HALKER, N. J. KUZNIR, D. W. MELLOR & K. R. WHITWORTH: The synthesis of fracture/strength logs using borehole geophysics: a new geotechnical service 15

F. C. BEAVIS, F. IVOR ROBERTS & LARISA MINSKAYA: Engineering aspects of low grade metapelites in an arid climatic zone 29

W. M. IRVING: Chloride ion concentrations as an aid to estimating recharge to the Woburn Sands 47

R. J. LISLE & C. S. STROM: Least-squares fitting of the linear Mohr envelope 55

Discussion by M. OWEN, B. J. CONNORTON & B. J. GREENFIELD; reply by E. H. MOREL 57

Discussion by T. R. HARPER 63

Proceedings of the Engineering Group of the Geological Society 67

No. 2

Papers from the meeting of the Engineering Group held at Burlington House on 10 February 1981 on Membranes in Ground Engineering

D. J. BURDON: Hydrogeological conditions in the Middle East 71

E. P. WRIGHT, A. C. BENFIELD, W. M. EDMUNDS & R. KITCHING: Hydrogeology of the Kufra and Sirte basins, eastern Libya 83

W. BAKIEWICZ, D. M. MILNE & M. NOORI: Hydrogeology of the Umm Er Radhuma aquifer, Saudi Arabia, with reference to fossil gradients 105

A. A. SHATA: Hydrogeology of the Great Nubian Sandstone basin, Egypt 127

J. KHOURI: Hydrogeology of the Syrian steppe and adjoining arid areas 135

L. J. WYLDE: Texture changes in crushed basalt road base 155

Discussion by P. L. MARTIN 175

No. 3

Papers from the meeting of the Hydrogeological Group held at Burlington House on 26 June 1980 on Aspects of Applied Hydrogeology in the Middle East

A. C. McGown & K. Z. Andrawes: An approach to laboratory testing of geotextiles 177

W. J. French, A. B. Poole, P. Ravenscroft & M. Khiabani: Results of preliminary experiments on the influence of fabrics on the migration of groundwater and water-soluble minerals in the capillary fringe 187

T. S. Ingold & K. S. Miller: The performance of impermeable and permeable reinforcement in clay subject to undrained loading 201

G. W. E. Milligan: Some scale model tests to investigate the use of reinforcement to improve the performance of fill on soft soil 209

D. D. DuBois, A. L. Bell & M. S. Snaith: A fabric reinforced trial embankment 217

P. R. Rankilor: The design of a two-layer permeable membrane/webbing filter system for a marine causeway wave defence system in the Gulf of Arabia 227

Michael S. Henderson: The potential use of a degradable erosion control membrane in the United Kingdom 233

S. R. Wellings & J. P. Bell: Physical controls of water movement in the unsaturated zone 235

B. Leach & R. Herbert: The genesis of a numerical model for the study of the hydrogeology of a steep hillside in Hong Kong 243

Proceeding of the Engineering Group of the Geological Society, 1980–81 261

No. 4

Working Party Report: Land Surface Evaluation for Engineering Purposes 265

S. A. Ola: Settlement of two oil tanks on Kaduna lateritic soils in Nigeria 317

Discussion by D. B. Smith 325

Discussion by S. Puri; reply by W. M. Irving 327
